Undergraduate Programs at Faculty of Pharmacy Universitas Airlangga (UNAIR)

A Gateway to Global Excellence

Universitas Airlangga offers high-quality undergraduate (S1) programs Pharmacy for both regular and international students in an inclusive and multicultural academic environment. Supported by experienced faculty, modern learning facilities, and a globally oriented curriculum, UNAIR prepares students to face real-world challenges with confidence.

With a strong academic reputation and international collaborations, UNAIR equips its graduates with the knowledge, skills, and global perspective needed to compete and succeed at both national and international levels.

Apothecary Education Program

The study period is 2 semesters with 36 credits (Program is only eligible to Indonesian citizens).

The program includes internships at :

- Pharmacy Retails
- Primary Care Unit
- Hospital
- Pharmaceutical Industry
- Pharmaceutical Distributor

At the end of the program, students will take a national exam (CBT and OSCE tests) to earn the title of pharmacist and be ready to practice in various areas of pharmacy.

FACILITIES

CLASSROOM

There are 12 classrooms equipped with modern learning facilities. Each classroom is designed to provide a comfortable and interactive environment that supports effective teaching and learning.

READING ROOM

The reading room provides a quiet, comfortable, and well-lit environment that fosters focus, concentration, and an enjoyable reading experience

OSCE CENTRE

The study program integrates a tutorial learning system and OSCE-based learning evaluations, starting from the undergraduate level, to enhance student competency and skills in pharmacy practice. It is supported by over 20 small discussion rooms, centralized at the OSCE center.

Free Water Refill!

Students can use the modern and comfortable co-working space as an ideal place for learning and collaboration, supported by high-speed internet, discussion rooms, and access to the latest learning resources and technology.

Learn with Joy

COWORKING SPACE

CAFETERIA

Coffee Studio

Kafe Farma

The faculty has a clean and comfortable cafeteria that offers affordable food and drinks, providing a nice place for students to relax and connect with others.

Featuring Pharmacognosy and
Phytochemical Identification

Multipurpose Laboratory for Raw Material
Identification and Characterization

LABORATORIES

Our microscopy laboratory offers a unique advantage—each student is provided with an individual microscope, ensuring a more efficient, focused, and comfortable learning experience.

Multipurpose Laboratory for
Formulation and Manufacture

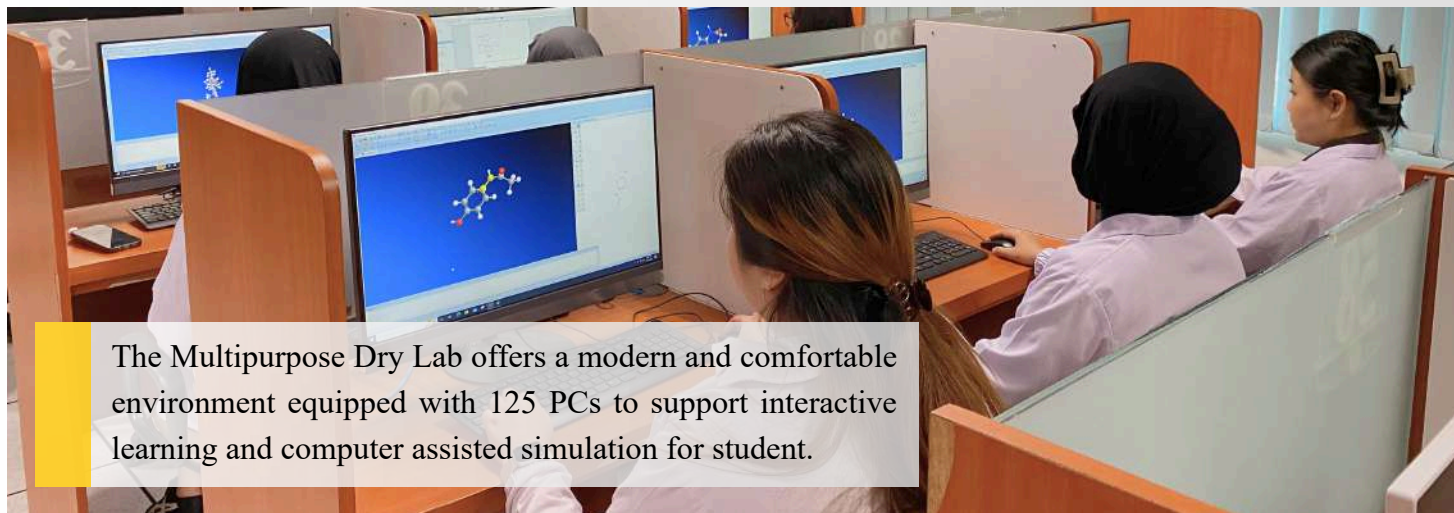

Featuring Mini-Industry and Advanced
Instruments for Formulation and
Product Evaluation

Featuring Pharmacy Service Workflows
in Community Pharmacy and Hospital

Dry Laboratory for Pharmacy Practice Simulation

MULTIPURPOSE DRY LABORATORY

The Multipurpose Dry Lab offers a modern and comfortable environment equipped with 125 PCs to support interactive learning and computer assisted simulation for student.

INSTRUMENTAL LABORATORY

The Instrumental Laboratory offers a modern environment equipped with numerous high-quality analytical instruments to support practical learning, student research, and skill development.

IN VITRO & IN VIVO LABORATORY

The faculty has a well-equipped in vitro laboratory that supports student research and practical learning in pharmaceutical and biomedical fields.

CAREER PATHS

Hospitals

The Faculty of Pharmacy, Universitas Airlangga is dedicated to equipping pharmacy students with strong competencies in clinical pharmacy to support patient recovery through professional, accurate, and safety-oriented pharmaceutical care.

Rumah Sakit Universitas Airlangga

Through close collaboration with Universitas Airlangga Hospital (RS Unair) and other leading hospitals in East Java, students gain valuable hands-on experience by applying their knowledge in real clinical settings, preparing them to become competent and trusted pharmacy professionals.

Pharmacist in Charge in Retail Pharmacy (Apotek) and Primary care unit (Puskesmas/Klinik)

Pharmacists graduated from Universitas Airlangga are trained with specific learning goals and competencies, emphasizing the ability to provide patient-centered care, strong communication skills, and a commitment to lifelong learning in providing pharmacy practice in retail pharmacy and primary care units.

Pharmaceutical and Cosmetics Industry

Pharmacists play a vital role in drug research, production, quality control, and distribution under strict standards. The Faculty of Pharmacy, Universitas Airlangga, is committed to preparing future industrial pharmacists with strong scientific knowledge, practical skills, and regulatory insight.

Through collaborations with leading pharmaceutical industries in Indonesia, students gain hands-on experience in innovation and quality assurance to ensure safe, effective, and reliable products that support healthcare and improve community quality of life.

Herbal Medicine Industry

The Faculty of Pharmacy, Universitas Airlangga prepares students for careers in the traditional medicine industry by equipping them with strong foundations in natural product science and pharmaceutical quality standards, including research, production, and quality control to ensure safe, effective, and reliable products.

Supported by collaborations with **traditional medicine industries in Indonesia**, students gain hands-on experience in herbal product development and standardization, enabling graduates to drive innovation and support public health through evidence-based, high-quality natural medicines.

Pharmacist graduates from Airlangga University are equipped with updated basic knowledge and advanced applied skills in pharmacy practice, quality assurance, public health, and drug development, enabling them to work in medical distribution, education, government, research centers, and entrepreneurship, contributing to teaching, innovation, policy development, and business growth.

Tokyo University of Pharmacy and Life Sciences

GLOBAL CONNECTION

Our faculty provides exciting opportunities for students to experience learning beyond borders through our Student Exchange Program. This program allows students to study at partner universities abroad, gain global perspectives, and build international networks. Through academic collaboration, cultural exchange, and real-world exposure, participants develop adaptability and cross-cultural understanding valuable skills for both personal and professional growth.

Participating in student mobility programs in Thailand (2024) and Malaysia (2025) through IPSF has been a transformative experience for my global perspective. These programs allowed me to gain international pharmacy insights, enhance multicultural communication, and build a global network. I am deeply grateful for the financial and facilitative support from the Faculty of Pharmacy, Universitas Airlangga, and BEM FF UNAIR, which demonstrated the vital role of a supportive university in fostering a student's academic and personal growth.

— Yoga Ananda (Farmasi UNAIR, 2022)

TESTIMONIAL

My name is **Natalie Panashe Msipa**, a pharmacy student from Zimbabwe (Batch 2024) at Universitas Airlangga. Currently in my 3rd semester, I have found my journey here deeply rewarding, particularly through hands-on experiences in well-equipped laboratories and my favorite subject, Pharmacy Practice, which allows me to connect science with patient care. Beyond the rigorous academics, the warm and welcoming community of lecturers and peers has made my cultural transition to Indonesia seamless and enjoyable. This international experience has not only strengthened my pharmaceutical expertise but also fostered my personal growth in a vibrant, supportive environment. Terima kasih!

I'm **Marikke Nawang Pangestuti**, a 2024 Pharmacy graduate and 2025 Apothecary alumna of Universitas Airlangga. My professional education was a transformative journey, blending a rigorous curriculum with diverse rotations in community, industry, and hospital settings that sharpened my clinical skills. The program's focus on real-world applications, such as patient counseling and case discussions, taught me to practice with precision and empathy. Supported by a collaborative academic community, this experience has shaped me into a professional committed to integrity and community service. I am truly grateful for the growth and opportunities at Universitas Airlangga.

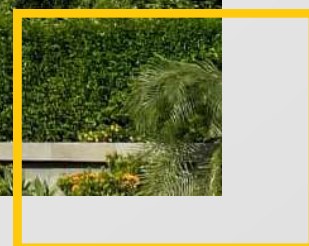

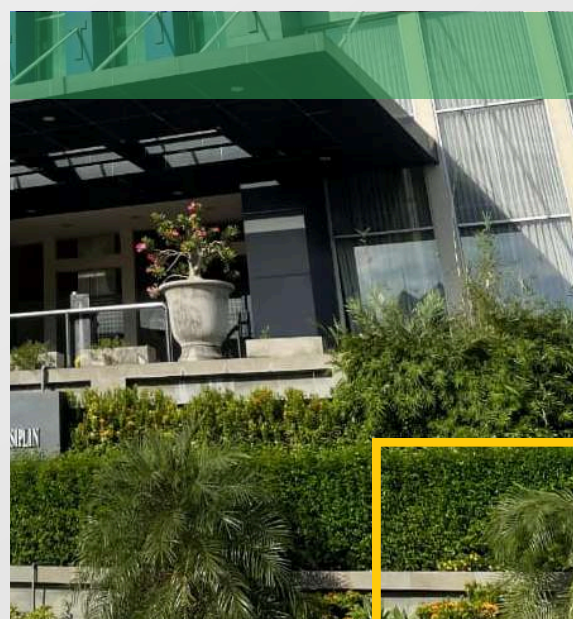

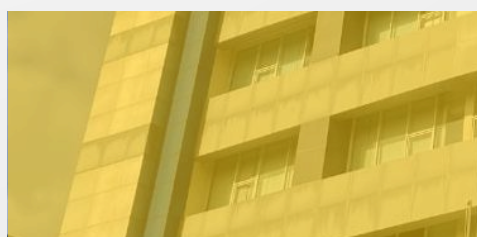

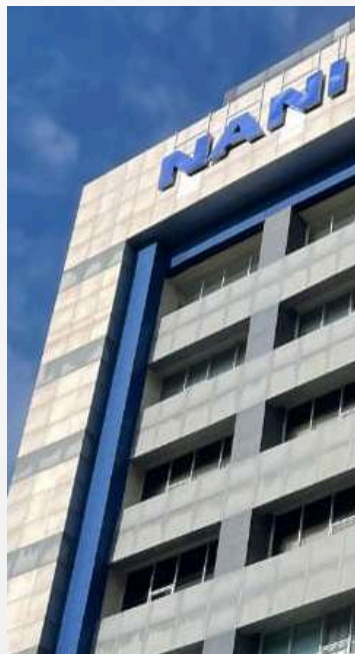

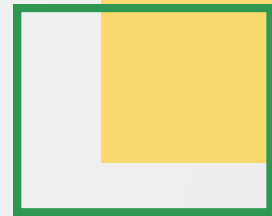

I am **Nabila Ayu Styoyantiwi**, an undergraduate Pharmacy student at Universitas Airlangga. Studying Pharmacy here provides a strong foundation in pharmaceutical sciences through an integrated curriculum combining theory, practical learning, and critical discussion, which develops analytical thinking and professional responsibility.

In addition to academics, my role as a Pharmacy Student Ambassador has enhanced my communication skills, confidence, and ability to represent the program's values. Overall, the Pharmacy program at Universitas Airlangga prepares students to become competent, responsible pharmacists who are ready to contribute to society.
